

Core Goal:

The goal for this project is to build a simple e-commerce system in which users can order products and staff can manage the inventory.

User Requirements:

- View products – see all available products as well as their price and stock quantities
- Purchase Products
- View order history
- Register/Login
- Restock products
- Manage inventory

System Requirements:

The system will:

- Store customer information
- Store product information
- Track inventory quantities
- Store orders
